Hon'ble Captain Amrinder Singh,

Chief Minister, Punjab.

SUBJECT: Tests for Corona through pooling of blood samples

Dear Sir,

The people of Punjab have been witnessing for the last two weeks the manner in which the Punjab Government under your stewardship has waged a war against outbreak of Corona. It is therefore, our duty towards the Government and the people of Punjab that we should assist the State Government in every possible manner in this warlike situation.

A few days ago, former Chief Secretary, Shri Sarvesh Kaushal, had given a suggestion on his face book for expediting tests for Corona through pooling of blood samples. Now, a report has been published in today's news papers that Haryana Government has started testing blood of Corona suspects through pooling process. A sample of 16 corona suspects is taken together for testing, and if the whole sample is found to be corona negative, the indication is that all those corona suspects, whose blood samples were so pooled, and tested, are corona negative, and then each of the 16 individual blood samples is not required to be separately tested. If the aforesaid suggestion is found acceptable, it would surely help the Government in testing blood samples of maximum people within minimum time. You will kindly appreciate that lock down is more successful, if the lock down period is utilized for maximum testing.

Kindly get into touch with Shri Sarvesh Kaushal, and/or Haryana Government, for ascertaining more details of the suggested procedure.

With regards.

Yours Sincerely,

(H.C. ARORA)
